Summary

Final-year **Computer Science** student at Graphic Era University with experience in **full-stack development**, **backend engineering**, and **cloud computing**. Proficient in **C++** with a strong foundation in **Data Structures & Algorithms**, and hands-on experience building applications using **SQL**, and **AWS**. Seeking **Software Development Engineer** opportunities to contribute to impactful products.

Education

Graphic Era University, Dehradun <i>B.Tech in Computer Science & Engineering</i>	2023 – 2027 <i>CGPA: 7.7/10</i>
B.R. Modern School, Pauri <i>12th CBSE</i>	2023 <i>93%</i>
St. Thomas School, Pauri <i>10th ICSE</i>	2021 <i>96%</i>

Technical Skills

Languages: C, C++, Python
Frontend: JavaScript (DOM Manipulation, Event Handling, Async), Responsive UI Development
Database: MySQL, DBMS, Normalization
Cloud / DevOps: , Git, GitHub, AWS
Developer Tools: VS Code, Git, GitHub

Projects

- AST Code Optimizer** | *C, Flex, Bison* | Jan 2026 – Feb 2026 Source Code
- Collaborated with a peer to build a C-based mini-compiler; independently designed and implemented the **Flex-based lexical analyzer**, tokenizing a C-like language's keywords, identifiers, operators, and literals with line-tracked error reporting.
 - Contributed to a **Bison (Yacc)** parser generating an **Abstract Syntax Tree (AST)**, and a multi-pass **optimizer** performing constant folding, constant propagation, strength reduction, and dead code elimination before regenerating optimized C code.
- Smart Hospital Management System** | *React.js, Django, PostgreSQL* | Oct 2025 – Jan 2026 Source Code
- Collaborated with a peer to build a **role-based** hospital management platform (Admin, Doctor, Patient portals) using **Django REST Framework** and **PostgreSQL**, with **JWT authentication**, **RBAC**, and an ML-based symptom checker.
 - Built the **React.js** frontend and integrated it with backend REST APIs, implementing **Axios interceptors** for automatic JWT token attachment and refresh handling.
- Online Clipboard Platform** | *HTML, CSS, JavaScript, Firebase* | Jun 2026 – Jul 2026 Source Code
- Built a publicly accessible **online clipboard platform** enabling users to securely share text across devices using unique share codes without requiring authentication.
 - Integrated **Firebase Firestore** for temporary cloud storage with automatic expiration, achieving average retrieval times of under **1 second** and supporting **10+ concurrent user sessions** during testing.

Certifications & Achievements

- AWS Cloud Practitioner Essentials**
- Competitive Programming & Open Source** – Solved **300+ DSA problems** and contributed to **Hacktoberfest 2025** with accepted **GitHub pull requests**.
